Sundance XP 3D-Photoprint Finishing

Realistic Fish-skin Optic

Behavioral Movement:

This bait can be used as a wobbler, troll, or spin-bait. You determine the diving depth: simply allow it to sink to the desired depth and then begin to animate the lure. Short pauses allow it to sink in slow-motion, which causes most fish to bite.

The Sundance XP 3D is equipped with various features: Treble hook, diving shovel, fish-tail.

- 3D – Photoprint finish in real fish optic
- The Sundance XP 3D is comprised of a true to life, rubber-coated plastic head.
- The “Sound Chamber” provides for a stimulating signal – alerting every predatory fish – even in the murkiest of waters.
- The specially attached tail-piece guarantees a life-like swim motion.
- The “Slow Sinking” feature, provides for an upright submerging of the bait with a sink rate of approximately 1 meter in 6 seconds.

Umbrella-Rig

The newest of trends from the land of unlimited angling possibilities (USA). At first glance, the "leader" looks a bit strange or even funny; but it will surprise you!

It is simply attached to the main line – and 5 baits (spinner, plastic bait etc.) are attached to the side. Should angling with only one hook be allowed, then simply attach one hook with bait to one arm and a spinner blade to each of the other 4 arms. The Umbrella-Rig is for casting or trolling.

Not only for freshwater angling; also quite suitable for flat-fish angling on the Baltic.

5 Arms – equipped with security swivel and karabiner. 1 pc. in OPP-bag
