# Felchen & Renken

## Renken/Felchen-Floats

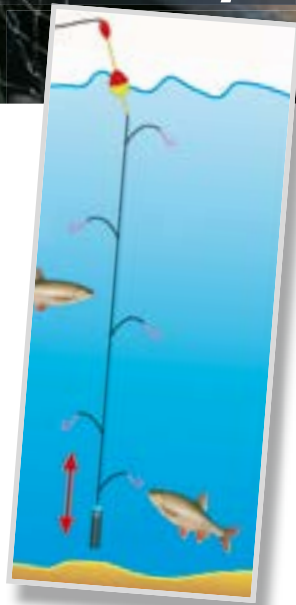

The Renken/Felchen floats manufactured with unbreakable material are balanced in such a way that with a tipped float position combined with waves – a bobbing motion is produced causing the nymphs on the hegenen to move.

Both types are slip-through, and come with swivels, making them excellent for fishing while floating, on the bottom, or from the bank.

**5 Nymphs per system**

Length: 1,80 m / 0,20 mm.

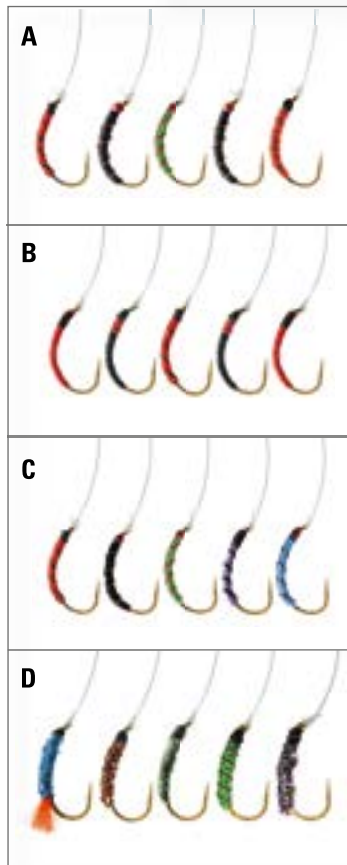

**HOOK SIZE 12/14/16**

### 5 Nymphs per system

The highly successful and most commonly used bait system for Felchen-Angler in the alpine lakes. Favored for Renken, Perch, and other types of coregonen. The hegenen are in successful color variations; mounted and ready to go, wound up on a styrofoam card.
