

# Norway-Pilker

The real big boys are usually found at great depths. In order to quickly get to the fish during the drift, the Norway-pirk has a rocket-like shape. This causes it to shoot straight down without delay into the deep.

## Bergman Pilker

The most well known traditional Norway pirk is back. Its unique "Wave-Form" makes for a super fast descent into the deep where it then sends out stimulating signals to large fish. With super strong split rings.

Pilker And Systems: Light for the Baltic Sea – Heavy for Norway

## Søren Pilker

Quote from frequent Norway-Travellers: "We consider this to be one of the best Norwegian pirks, taking in consideration both the shape and the color constellation. It is also the pirk that can not be topped when it comes to casting!"

## Deep Catcher Lure – lead free

The real heavy lunkers are usually found in the deep. In order to get right to the fish during drifting, the Deep Catcher Lure features a straight and slender shape. This causes it to nose-dive to the bottom without getting lost. In order to protect the environment and sea, this lure is manufactured from steel and not lead
