

Centron® Fluor Carbon

- Invisible: Light breaking factor is almost exactly the same as that of the water.
- Fluor Carbon is heavier than water and sinks faster than normal monofilament line. It doesn't float away as fast, meaning smaller line loops in the water and more secure retrievals over larger distances.
- Length: 30 m
- Parallel wound

Item-No.	Ø mm	kg-Test
3426 012	0,12	1,2 kg
3426 014	0,14	1,3 kg

3428 100	1,00	45,0 kg

Sunset AMNESIA

Amnesia/Zero-Twist – 100 m

Produced in the USA, it is cooled immediately after using the extrusion process. The extremely high molecule density reduces line twisting to a minimum. The line straightens out immediately, ideal for leaders in salt and fresh water. 100 m spools.

Centron® Pro-Carp Camou

A milestone innovation in line-technology!

High quality monofilament with minimized stretching, high knotting and abrasion resistance qualities. The special camouflage color blends in well with the bottom of the water – making it nearly invisible to the fish.

The molecular seal prevents it from taking on water, lending it enormous qualities. A perfect "tempering" (Heat-Stretching) makes the CENTRON® Pro-Carp Camou stretch resistant and assures for a more direct contact with the fish. Also ideally suitable for feeder-angling.

Item-No.	Length	Ø mm	kg-Test
3438 028	500 m	0,28	6,1 kg
3438 030	500 m	0,30	7,1 kg
3438 032	500 m	0,32	7,9 kg
